

SEJEM MEGRA

35. INTERNATIONAL FAIR FOR CONSTRUCTION

25. - 27. 3. 2026

Gornja Radgona

THE GREEN TRANSITION IN CONSTRUCTION!

MEGRA FAIR 2026 BUILDS COEXISTENCE WITH NATURE

Construction is undoubtedly one of the most important economic sectors, as we cannot imagine any activity or civilization without buildings. For five decades, the MEGRA fair has been promoting the significance of construction in our society. Slovenian construction, craft industries, and the building materials sector, together with educational and research institutions, seek new solutions and innovative approaches and, with the help of the fair, introduce them to investors, contractors, as well as pupils and students.

MEGRA, the 35th International Construction Fair, will look toward the future of living with digitalization, automation, green and energy-efficient buildings, and the career opportunities they create. It will explore modular construction, new smart materials, and connected infrastructure. It will encourage projects aimed at increasing resilience and infrastructural durability. It will improve working conditions and ensure the health of builders and residents. The fair will offer technologies for the use of renewable energy sources and top-quality craft products and services. Contractors will be equipped with modern machinery, tools, equipment, and knowledge.

The Chamber of Construction and Building Materials Industry at the Chamber of Commerce and Industry of Slovenia (GZS) will present the most important Slovenian companies under its umbrella. Regional Chambers of Craft and Small Business of Pomurje and sections of the Slovenian Chamber of Craft and Small Business will showcase shortage occupations and the offerings of their members. Innovative business exhibitors will present the latest products and services.

MEGRA 2026 will bring together stakeholders from the construction sector at numerous professional and business events. It will connect them through the international business meeting MEET4BUSINESS. The Education and Career Day of Slovenian Construction will guide young people toward targeted education and careers in leading companies.

Visitors will have access to free daily expert consultations on renewable energy sources and energy efficiency, as well as information on obtaining non-refundable grants or favorable loans from the Eco Fund. Experts from the Building Institute ZRMK will provide advice on comprehensive building renovation, sustainable air conditioning, and architectural solutions.

We invite you to join the synergy of construction with related professions, experts, manufacturers, contractors, and providers. Let's build a sustainable future together!

Pomurski sejem d.o.o.
President of the Management Board
Janez Erjavec

Welcome to MEGRA 2026!

Why visit MEGRA 2026?

- An overview of the latest trends and technologies in construction, energy, utilities, and crafts.
- Opportunities for business networking.
- Expert consultations and current topics.
- Presentation of innovative solutions and materials.
- Career Day for job seekers and students.
